How to Build Max-Performance Mitsubishi 4g63t Engines-Robert Bowen 2008-12 The photos in this edition are black and white. Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.

Original. 350,000 first printing.

Driving from Japan-Wanda James 2015-08-13 This study chronicles the success of the Japanese car in America. Starting with Japan’s first gasoline-powered car, the Takuri, it examines early Japanese inventors and automotive conditions in Japan; the arrival of Japanese cars in California in the late 1950s; consumer and media reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars gained popularity through shrewd marketing. Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally-sound vehicle.
